About BioSpecifics Technologies Corp.

BioSpecifics Technologies Corp. is a biopharmaceutical company that has developed and licensed injectable collagenase for three clinical indications: Dupuytren's disease, Peyronie's disease and frozen shoulder (adhesive capsulitis). It has a development and licensing agreement with Auxilium Pharmaceuticals, Inc. Positive top line results from the Phase III clinical trials with XIAFLEX(TM) for treatment of Dupuytren's disease were released in June 2008. More information about the company may be found on its website at www.biospecifics.com.
